1. EXECUTIVE SUMMARY

- 1.1 This Quarterly Environmental Monitoring & Audit (EM&A) report presents the EM&A works performed in the period between December 2024 to February 2025 for “Port Shelter Sewerage, Stage 3 – Sewerage works at Po Toi O”.
- 1.2 The impact stage EM&A Programme for the Project includes air quality, noise, water quality, waste, ecology, fisheries, landscape and visual and built heritage monitoring. The recommended environmental mitigation measures were implemented on site and regular inspections were carried out to ensure that the environmental conditions are acceptable.
- 1.3 The EM&A programme was carried out by the ET in accordance with the EM&A Manual requirements. It is concluded from the EM&A works that adequate environmental mitigation measures have been implemented by the contractor where appropriate in the reporting quarter.
- 1.4 The construction commencement date of the project was revised on 27 April 2021. The construction commencement date of provision of village sewerage to the unsewered areas of Po Toi O has been revised from 1 March 2021 to 16 June 2021, and the construction commencement date of village sewerage construction of the local sewage treatment plant (STP) has been revised from 10 May 2021 to 16 June 2021. In view of the revised construction commencement date, the EM&A programme was subsequently suspended from 28 April 2021 until 16 June 2021.

Exceedance of Action and Limit Level

- 1.5 There was no action or limit level exceedance record of construction noise and air quality was recorded in the reporting quarter.

Implementation of Mitigation Measures

- 1.6 Construction phase weekly site inspections were carried out to confirm the implementation measures undertaken by the Contractor in the reporting quarter. The status of implementation of mitigation measures during the reporting quarter is shown in **Appendix E**.

Record of Complaints

- 1.7 One complaint was received on 26 February 2025 via EPD’s email. The complaint from a member of the public regarding environmental nuisance caused by polluting effluent discharged related wastewater treatment facilities, general construction noise (within Restricted Hours), construction dust. Referring to the investigation conducted on 27 February 2025, an inspection with EPD shall be conducted on 3 March 2025 and the investigation report shall be submitted by 5 March 2025 shows that the complaint was considered non-project related.
- 1.8 No air quality, noise and water complaints during 0700 – 1900 hours on normal weekdays was received in the reporting quarter.

7. COMMENTS, RECOMMENDATIONS AND CONCLUSION

Comments

7.1 Based on the observations made during site audits and construction dust and noise monitoring results, no non-compliances and exceedances of air quality and noise limits were recorded. Water quality exceedances were recorded and investigated and no project related exceedances were recorded.

Recommendations

7.2 Reviewing the implementation of the recommended mitigation measures in the EM&A Manual, it was observed that they were effective and efficient in controlling the potential impacts due to construction of the project during the reporting quarterly. Review of the effectiveness and efficiency of the EM&A programme will continue, and recommendations will be provided to remediate any potential impacts due to the project and to improve the EM&A programme if deficiencies of the existing EM&A programme are identified.

Conclusion

7.3 The EM&A programme as recommended in the EM&A Manual has been undertaken since the construction works of Port Shelter Sewerage, Stage 3 – Sewerage works at Po Toi O works commenced on 1 March 2021.

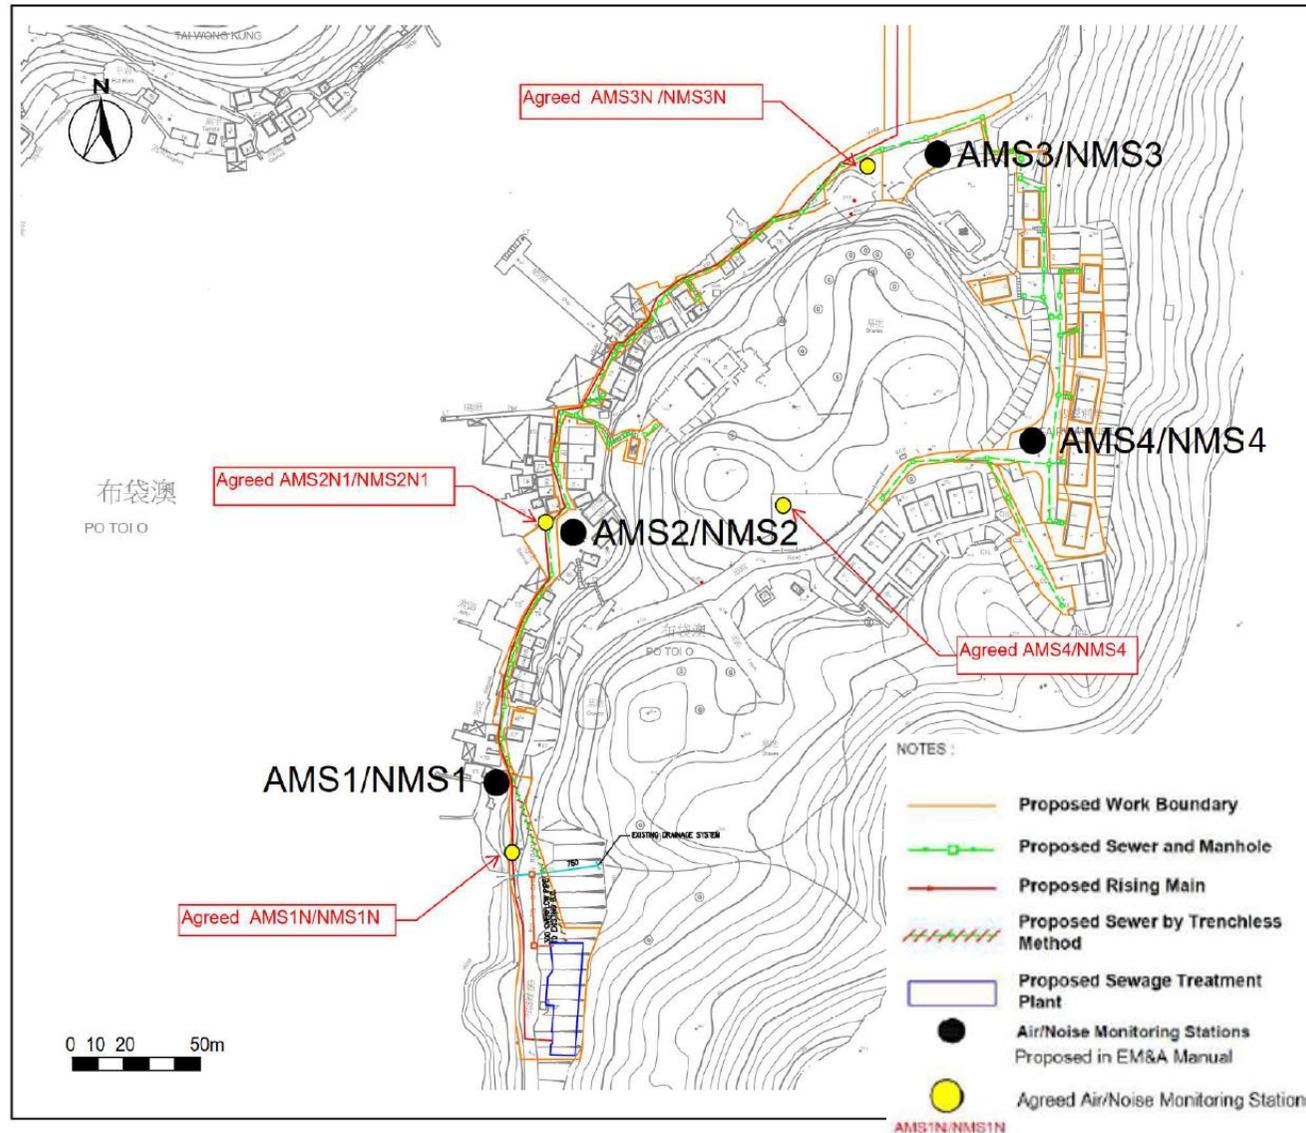

7.4 Monitoring of air quality, noise and water quality with respect to the Project is underway. In particular, the 1-hour TSP, 24-hour TSP, noise level (as Leq, 30 minutes), dissolved Oxygen (DO), turbidity and suspended solids (SS) under monitoring have been checked against established Action and Limit levels. There was no breach of Action and Limit Levels for 1-hour TSP, 24-hour TSP, noise monitoring and water quality (DO and turbidity) in the reporting quarter. Exceedance of suspended solids were recorded, investigated and no project related exceedances were identified.

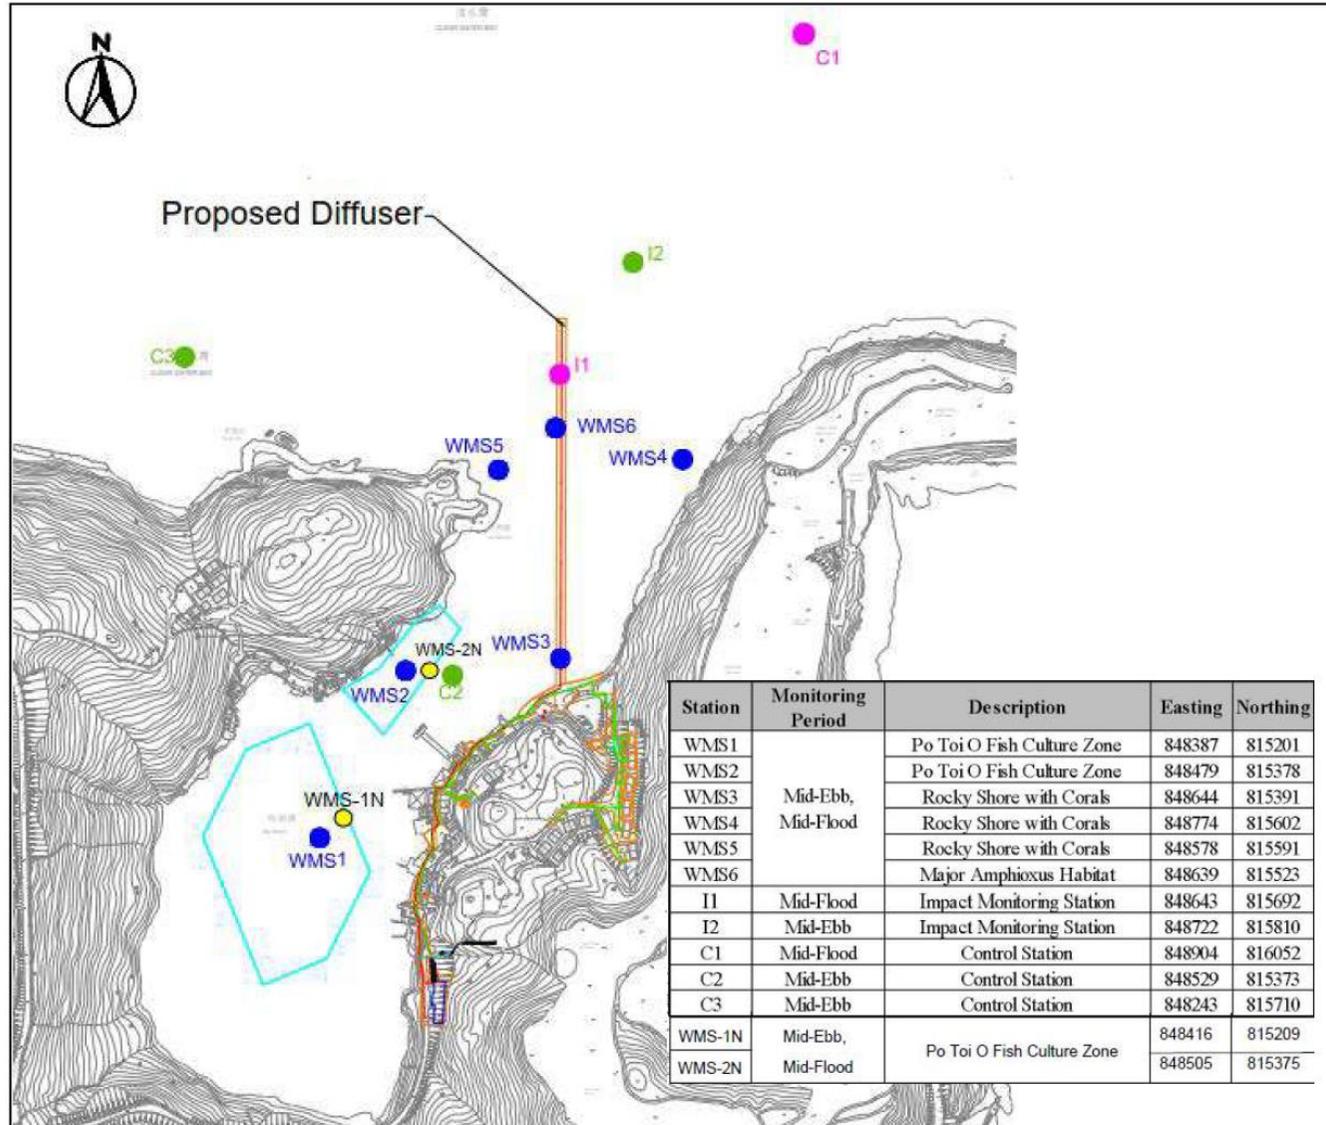

7.5 One complaint was received on 26 February 2025 via EPD's email. The complaint from a member of the public regarding environmental nuisance caused by polluting effluent discharged related wastewater treatment facilities, general construction noise (within Restricted Hours), construction dust. Referring to the investigation conducted on 27 February 2025, an inspection with EPD shall be conducted on 3 March 2025 and the investigation report shall be submitted by 5 March 2025 shows that the complaint was considered non-project related.

7.6 No notifications of summons or successful prosecution were received during the reporting quarter.
